“THE  
ESSENTIAL  
CCTV  
MANAGEMENT  
TOOL”

## INTRODUCING EXPERT

FUSION-Expert is the next generation of CCTV management information software. Building upon the success of its predecessor, Expert delivers all of the previous functionality and capabilities plus so much more. It helps you to create, view and edit incident-logs quickly and efficiently, and with the assistance of powerful built-in search, filter and KPI tools it effortlessly produces information rich reports with just a few mouse clicks.

Available as a standalone or fully integrated Fusion product, flexible licensing allows customers to select which features they want to create a bespoke package.

New functionality includes: Whiteboard, Workflow, Remote Request to View & Seize (RTVS), Universal Login & Last Incident Log Saving and Recording.

# FEATURE COMPARISON

## Product Features

Select

- KPI Financial Analysis
- Contacts Database
- Preset Search Filters
- Audit / Track RTVS
- Workflow
- Whiteboard
- Remote RTVS
- Universal Login
- Resizable Forms
- Camera Checks

# FEATURE FOCUS

FUSION-Expert brings a host of new features to your fingertips, providing an unrivalled level of functionality to be the most comprehensive Incident Logging platform available.

## WHITEBOARD

The Whiteboard feature provides operators with the ability to write and save messages for the Workstation or Console that is being used. A productive, communicative tool, Whiteboard can be used as a way for operators to communicate between shifts.

## WORKFLOW

The Workflow feature allows operators to create their own procedural library; import documents, images, and instructive charts which can outline incident requirements and response instructions for others when handling a specific record.

## REMOTE RTVS

The Remote RTVS feature keeps a uniformed and comprehensive record of all requests to view and seize, helping to maintain an organised workflow. These records can be stored under configurable field names to meet the required procedures and terminology of the control centre.

# TAILORED PACKAGES

Create a complete incident logging platform that can be scaled for any project. FUSION-Expert puts you in control, with tailored licensed options that provide you with greater flexibility over cost and features when selecting your package. You have the opportunity to choose exactly which elements you require in order to create the most cost effective solution for you.

Now more accessible than ever before, FUSION-Expert is available as a complete standalone solution.

Unlike its predecessor, it is entirely self-sufficient, as all functionality is available within a single software application, providing an all-in-one incident logging package.

Expert can also be integrated with a FUSION VMS (Video Management System) to optimise its functionality as an incident logging platform. Allowing you to create reports directly from the recording process at the single click of a button.

“INCIDENT LOGGING HAS NEVER BEEN SO EASY”

# REQUIRED SPECIFICATIONS

The minimum requirements for both Console and Workstation instances of FUSION-Expert have been listed below:

OS: Windows Vista Business, Ultimate; Windows 7 Professional, Ultimate; Windows 8 Pro, Enterprise; Windows 10 Pro, Enterprise; 32 / 64 bit.
